**N**otwithstanding the various Reports that are spread abroad of Our Death, yet it hath pleased God still to preserve Us in the Land of the Living, and to enable Us to write this Ensuing Anglicus for the Year 1677. Very true it is, That upon the seventh of November 1675. we were taken with a Vomiting for some hours, after which followed a continued Fever more or less during the Months of November, December, January, February, which brought Our Body to a general weaknes, and withall to a suffusion in Our Eyes, of which we have no hopes of Cure, by reason of Our great Age.

In this following Discourse, We, for the Benefit and Encouragement of the Sober and Industrious Students in Astrology, have inserted a Catalogue of all the Conjunctions of the two Superiour Planets, Saturn and Jupiter, since the Creation of the world untill the Year 1682. Some Critical persons may object, and say, Quorsum hæc? We Answer, That hereby the more Serious and Industrious Sons of Art, who for the future shall be desirous to write or Consider of the General Accidents of the World; may from hence (I hope) to their great Benefit and Satisfaction have a more certain Radix, to discover how, and under what Triplicity all Famous and Miraculous Actions, Great Kingdoms, Monarchies or Families had their Original, or first Epoche's.

There are many Judgements Astrological inserted, which will not be manifested this Year, but in succeeding Times. Collected or Observed they were from Experience of former Times, and many Observations verified in Our Age, and since we began to write. Many things we Treat of are obscure, and will not be

understood but by the Sons of A R T.—— We have avoided partiality in all Our Predictions as to the Allies of His Majesty of ENGLAND—— But had we liberty of emitting into the world what we might very well Predict, then we Affirm it would appear, That Astrology is a most Noble Study, and the Influences of Heaven do signifie very much—— If we have Animadverted upon the City of London's Affairs; we profess seriously it's out of the high Esteem and Love we have to that most Honourable City wherein we lived so many years, and by Gods Mercy obtained a sufficient Patrimony for Our Maintenance in our Old sickly Age.——

We desire to give no Offence, but such is the peevishness of Men and the Times, That we have been silent in some material Affairs; for we let the Nation know, that since we wrote first, we have been Nine times under Restraint to Our great Cost and Charge—— We are now retired, and all the residue of that time which it may please God to permit Us to live, we will endeavour to spend it for the health and welfare of all His Majesties poor Subjects adjacent to the place (or Countrey) we live in—— and when it shall please the Almighty to call Us out of this world, we leave behind Us (to continue what so many years we have carried on for the Honour of Astrology) that Industrious and no less Ingenious Artist, Mr. Henry Coley, of whom We have very great hopes, and know Him, from Our own Experience, to be a person qualified with such Parts and Abilities, that he is capable both Naturally and Artificially to write in this Our Method, and therefore deserves Encouragement therein.

# Astrological Judgements

And Observations for the Year 1677.

By William Lilly Student in Astrology.

**A**strology is an Excellent Science, but most Laborious and full of Difficulty, as We in the whole Course of Our Writing since the Year 1644, (being the time We first appeared in Print) have experimented.

Ptolomy in the first of his *Centiloques* observing so great variety of matter, and the sundry Influences of so many and great Stars, thought it a hard and difficult thing to consider thoroughly and exactly the *Celestial Mixture*, saying in his first Aphorism, *Abste & à Scientia*, &c. For it is impossible that a Man, though never so knowing, should distinguish the particular forms of things; "Even as sense also receives  
"not a particular but a certain general form of sensible matter; and he that treateth of these things must only conjecture, for none but such persons as are inspired from above can foretell particulars. He farther tells Us, "That  
"there is something supercelestial that assisteth a man in  
"Predicting future Events: For then by the *Syncretism* of the Stars, and of the *Intelligences* We are able to Prophesie of things to come. Wherefore it is manifest, that only those who have the knowledge of future things through the better part of the *Soul* come the nearest unto truth; since no man can deliver his Judgment according to the operation of the Stars, unless he be such a person as hath well considered the natural complexion of the *Soul*, and thereby deservedly may be called and esteemed a *Wise Man*: For the *Soul*

### *Astrological Judgements.*

doth assist in Celestial Influences and Operations, as the *best Husband-man* doth Nature, in ploughing and manuring the Earth; nor can any man teach the mixtures of the Stars who hath not first learn'd their natural differences and tempers.

Now although there be many *Astrologers*, and all study the same Books, yet they do not all Collect the truth of things, but one more than another; and so it is in *Physick*, when *Physicians* do observe signs of divers Diseases, of Recovery, and of Death, for there happeneth frequently contrariety amongst them, notwithstanding all of them read the same *Authors*: So in *Astrology* likewise we may observe now in our days many *Proficients* in that study, and some that proceed no farther than the resolution of *Horary Questions*, and even in that part, such persons who are qualified as before mentioned, do far exceed others, and those perhaps more learned than themselves.

Again, others there are (but they not many) who make use of *Astrology* in the *Diagnosticks* and *Prognosticks* of *Diseases*, and indeed therein it is of great use and special advantage unto either the learned or unlearned *Physician*; for from the *Position* or *Figure of Heaven* erected either for the time of the *Sick Patients Decumbiture* (if it can be obtained) or upon the first inspection of the sick persons Urine, (which we especially observe) or sometimes upon first sight of the sick person (when invited to see him) we say from hence a very probable Conjecture may be given of the peccant humour, of the infirmity, of its *Crisis*, of its *Changes* or *Variations*, as also whether the Distemper will be long or short, whether it tend to Life or Death, a certain determination whereof can by no other natural means be discovered but by *Astrology*: And although it is not much practised at present by many learned (or so accounted) *Physicians* of this Age, yet *Hippocrates* and *Galen* the most Eminent in that Learning that yet ever lived, have wrote most Excellent Aphorisms and committed them to Posterity, whereby the Industrious Sons of *Astrology* and *Physick* may with great satisfaction to themselves and sick Patients give a more hap-

py and sound judgement either of *Life* or *Death*.

But it shall be our Labour at this time to write of the various Actions of the World (Sicknesses especially) and such mundane concerns as may casually happen this year, 1677. which We will endeavour to perform (according to Our present weakness of Body, and suffusion of Our sight) from the grand Configurations of the Superiour Planets, Ingresses of the Sun into the four Cardinal Points the ensuing year, as also from the late preceding Comets of 1664, and 1665. not omitting the consideration of the last Comet in the year 1673. or any Eclipses that shall happen in this year.

And first of all, (since the Wars are now begun at Messina in Sicilia) we shall commit to Posterity some Remarks intended for the Press in our *Anglicus* for the year 1670, but not then Imprinted; the Discourse is as followeth, viz. *Spineus* an Excellent Physician, and no less expert in Astrology, in his *Catastrophe Mundi* (Printed many years since) very judiciously hath forewarned Europe of the now present impending Calamities, Wars, Slaughters of Men, and Controversies, &c. For in Pag. 33 of his Book Printed in English 1647. he hath these words, (after a large and copious Discourse therein related) viz. "Moreover, 1659 is the period of the Revolution of the fourteenth Orb, in which the Moon and Sign Leo shall have Dominion, and the Revolution of the fifteenth Orb shall begin, in which Saturn and Virgo shall bear Rule, which Sign of Virgo was the sign of the Conjunction before the coming of Christ, and is afflicted by Saturn; wherefore there shall arise great Changes in the World: So also if we add the great years of Jupiter, to the year of the Mock-Star 1572, viz. 79 they bring us to 1657. Without doubt in the latter years there shall almost be a Destruction of Monarchs, because in those years there will happen most powerful influences of the Stars. Thus *Spineus*.

To verifie this his Judgement, We are not ignorant that in December 1652, a New Comet, or *Stella Crinita*, of whose Influence or Effects We wrote in Our *Anglicus* 1654, but

shall

### *Astrological Judgements.*

shall only at this time Commemorate two of Our Predictions very considerable; The first was, That in the year 1672 there should a Foreigner enter Holland; in which year the present King of France entered first his Army into that Countrey, and many Judicious persons have verily believed that had his Army then marched presently to Amsterdam or the Hague, he had been Master of one or both: We confess, in Our Judgement of that year we mentioned both those Towns, but therein we were too particular—

Our second Prediction of that Comet was, of the Effects or Influences thereof upon the City of London; viz. “London is more concerned by this Comets Influence or Portents than the Effects or meer calamities of a Plague or Sicknes upon Man, or death of her Inhabitants—We farther said, “Assuredly there have not been greater Changes in the World, in general, or any City in particular than will happen in the City of London before 1672, “a great part, if not the greatest Catastrophe this Comet designs, being to fix upon that City in the end—

This sad Prediction had as lamentable Effects, for in the year 1665 a most Pestilent and devouring Plague destroyed very near One hundred thousand Inhabitants, and in the year subsequent, viz. 1666 was that most Monstrous Fire, which consumed about three parts of that flourishing City, if not more.

We return again to *Spinus*, whose words are thus, viz. “But what the Host of Heaven may portend after the year “1660 from the Mock-star 1572, we conceive, not only “the final destruction of the *Turks*; but also that there shall “be a great decay of *Christians*; and that not only all the “Kings and Potintates of the Earth shall be hurt by the several evil Constellations and Influences, &c.—

“But take heed all you Kings of Spain and France, you “Princes and Potentates of Italy, &c.—

“He proceeds, and speaks of *Rebellions*, *Treasons*, sudden “Desolations, and utter ruine and mischiefs of all kinds, “for saith he, every immoderate constitution of the Stars “brings

### Astrological Judgments.

“ brings death amongst old and infirm people, but to others  
“ violent events, cruel and utter ruine. Thus far this learned  
ed *Italian*, of *Montana*, whose words or *Predictions* have had  
their Effects sufficiently since the year 1660; for what Na-  
tion of *Europe* since that year hath not been molested with  
Wars or other strange Calamities as mischievous? We the  
rather mention these excellent *Predictions* of *Spinius*; be-  
cause we live to see their effects, and matters presignified  
or portended from the Influence of the Comet 1572 are  
now in action and agitation, and have effectually operated  
since the year 1672. Neither let any Judicious person  
think it strange that the Comet of 1572 manifested not its  
effects sooner, but rather admire the mercy of a gracious  
God, that hath given mankind so many years for Repen-  
tance, and prolong'd his fierce Judgments so long a time.

The mentioning of a great and new *Monarchy* by *Spine-  
us* brings to my memory what *Cardanus* wrote, that towards  
1700, or near that time, *Omnia nutu unius regentur*; all  
things or matters should be govern'd by one person: And  
the profoundly Learned *Trithemius*, a man divinely conver-  
sant in the occult or secret learning of the *Ancients* in his  
Treatise of the Government of the World by *Secundarian  
Intelligences* delivers as a secret, and in a kind of *Anigma*,  
viz. That there would be a Translation of one *Monarchy*,  
or of some Great Kingdom, of which judgment many grave  
and sober Authors (both Divine and Humane) since his time  
have been, and it would be too tedious to repeat all which  
hath been delivered to that purpose.

There hath not been yet since the time of *Trithemius* his  
writing, or of *Tycho Brahe*, or of *Spinius* (who wrote the  
last of them) any such Translation, or new erected King-  
dom of *Monarchy*, as by them was manifestly predicted or  
prophefied of; assuredly their words or sayings will have  
certain effects in fulness of time, to the wonder and asto-  
nishment of all *Europe*: Such *Revolutions* of Kingdoms; or  
new Erection of a kind of Universal *Monarchy* require many  
times a *Century*, or two, or three *Centuries* of years before  
they

### *Astrological Judgments.*

they come to pass, or are effected or performed, as we Our selves have seen in this our present Age since 1602; viz. that *Miraculous Prophecy*, supposed to be the *Brittish Merlin's*, and delivered nine hundred years since, it is vulgarly called *Aquila*, or the *White King*; every Verse or Line whereof hath to admiration been performed, most of it since the year 1644, there remains now but the last three lines, which in few years will have their effects; besides many memorable Predictions of *Nostradamus* (so much sleighted formerly) have been apparently verified and performed also in this our Age, as that terrible and great Fire in *London*, Anno 1666, and that most unhappy accident which fell in *January* 1648, &c—— with some others concerning the *English Nation* which we pretermitt. But that which hath occasioned our farther disquisition is concerning the violent Eruption of *Mount Atna*, and it is this, viz. that since the year 1669—— the *Messineses* of *Sicilia* have declin'd the *Spanish Government* and revolted to the *French Monarch*, from whom hath proceeded since that fatal *Earthquake* a very fierce and sharp War, and consequently a great slaughter of many *Christians* both by Sea and Land, and amongst the rest, in one of those Sea-fights, the Famous and Noble *Ruiter Admiral* of the *Dutch* perished, a most worthy person and much lamented. Since which time also His Majesty of *Spain* in his *Netherland Dominions* hath been exercised in a continual defensive War; but these present Wars are but the beginning of what will hereafter happen in fulness of time.

The Mountain *Atna* hath relation to the *Spanish Kings* and Monarchy, or the Body of its Government; the Sides and Valleys, to his Governours or *Presects* and commonality of People or Subjects, and to his *Allies* in Unity and Peace with Him, or depending partly or wholly on him; the lower parts of the Mountain, to his Territories or Dominions lying near or far remote from the Confines of *Spain*; the roaring or great noise within Mount *Atna* manifest his Dominions or Countries of *Spain* it self and *Italy*; viz. the burthens

### *Astrological Judgments.*

burthens they groan under, and their willingness to revolt or change, thereby to ease themselves of their miseries. That *Earthquakes* are usually attended in their subsequent effects with War, &c. we have already wrote in our *Anglicus* for 1670. But as this of *Aetna* was not an ordinary *Earthquake*, so assuredly neither will these Actions presignified thereby be mean, but of extraordinary quality; for if the *Cedars* fall, the *Brambles* will most certainly suffer great calamity. If the *Sun* gives not his glorious light, what shall the *Moon* do who receives her light from the *Sun*? Now in regard the first appearance of the *Sun* clouded was towards his setting, it may therefore declare the time of manifestation of those designed *Catastrophes* may be prolonged before they fully break forth—but woe when they happen.

We might be more large upon this Subject, but to the Intelligent Readers what is writ may suffice—— Now as to the time of manifestation when these so wonderfull Mutations or Revolutions shall be effected or visibly declared, or put into action; we say, that although in part some breakings out there are *in Esse* at present, yet the most violent actions, or dreadful concernments shall not have full manifestation or perfect appearance untill three times ten years added to 1669 do come, which will be 1699—— Weighty matters require many years for their performances, yet in the mean time the powerful Configurations of the Superiour Planets, the remaining influences of the Comet or Comets in 1664, 1665, and also of that 1673 have in some measure begun those effects, which will in convenient time be more apparent long before the year 1699—— In the year 1682, and month of *October*, viz. the 20. day there will be a Conjunction of the two Superiour Planets *Saturn* and *Jupiter* in the 20. degree of that Regal Sign *Leo*, which is the terms of *Jupiter*, and wherein he and the *Sun* have their Triplicity, it will be the fifth time of their meeting in the fiery Triplicity since their Conjunction in 1603, at what time they changed one Triplicity and entered into another, which usually (if we may credit Antiquity,

### *Astroiological Judgements.*

tiquity, Experience or History,) hath not happened without considerable Revolutions and Changes in the world, *viz.* according to the nature of the Sign and Planet most essentially fortified, it being a difficult thing (some say impossible) to obtain the perfect hour of their true Conjunction, whereby a *Scheme* of Heaven might be erected, which would best and most clearly direct the quality or kinds of events; therefore it is best well to consider the *Lunations* preceding and subsequent, and what part of the Heavens the two Superiours are posited in, *viz.* in what *Mansion* or *House* of the Figures. We have observed that those Conjunctions which have in the year 1603, and since succeeded in the *Fiery Trigon*, have not been accompanied with propitious successes unto *England*, or the *City of London*. At the entrance of those Planets into the *Fiery Trigon* Queen *Elizabeth* died. In 1603 a great Plague was in *London*, and in the year 1623 the second Conjunction of the *Superiour Planets* fell in the seventh degree of *Leo*, not long after King *James* (a peaceable and wise Prince) died: Again, in the year 1625, at least fifty thousand persons died of the Plague in *London*. In a short time after follows the unfortunate business or attempt of the *Isle of Ree* in *France*, the murder of *Buckingham*, &c. and during all that time a general murmuring and repining of the Common People, especially amongst those of different Judgements, which gave encouragement to, and occasion of our late unhappy Troubles and Intestine Wars.

In the year 164 $\frac{2}{3}$ , the third Conjunction of *Saturn* and *Jupiter* was Celebrated in 26 degrees of *Pisces*; but the effects most concerned those People subject to the Sign *Aries*: Upon this Conjunction our late unhappy Calamities began, which more or less continued untill the year 1652. In that Intestine and bloody War many thousand persons of all degrees and qualities miserably suffered, and the *City of London* especially in her Trade and Commerce, with many other strange accidents which are yet fresh in every mans memory: but what is most remarkable after  
the

## Astrological Judgments.

the year 1663, was that in 1665; viz. the greatest *Plague* that ever happened in *London*, wherein 'tis credibly reported that near One hundred thousand people perished, and besides, in the year 1666, that Terrible and never to be forgotten Fire, which destroyed the greatest part of that Famous and Flourishing City; and these Calamities followed the Conjunction of *Saturn* and *Jupiter* in the Sign *Sagittary* of the *Fiery Trigon*, Anno 1663.—But what manner of Accidents shall precede or follow this next Conjunction of the Superiours in the Kingly Sign *Leo*, Anno 1682, which will be One hundred years and ten after the *Mock-star* of 1572, seventy nine years after the great Conjunction of *Saturn* and *Jupiter* 1603, and seventeen years after the appearance of the *Comet* in 1665, whose tail extended fiery and large towards the East part of Heaven, the effects whereof we judge are not yet in being, but will in part be put forward in or about the year 1682, or something later, with an heavy vengeance or judgment on those People and Nations providence shall dispose the effects to fall upon, by *Wars*, *Famine*, death of *Cattle*, several *Mortalities*, barrenness of the Earth, and cruel destruction of *Mankind*.—It portends great Rents and Schisms amongst the Religious Orders of *Monks*, *Friars*, *Jesuites*, as also amongst those of different Judgments, call them by what name you please; and this judgment is the more aggravated, in regard these two Superiour Planets *Saturn* and *Jupiter* do also meet again in the Sign *Leo*, in *May* 1683; (as appears by Calculation, and also by the *Ephemerides* of *Argol*) And hence I conclude this Conjunction to be the *Prodromus* of very prodigious effects, which we may not live to see transacted.

Repetition of the same things in *Astrology* cannot be avoided, according to the Opinion of the Famous *Cardanus* in one of his *Segments* of *Astrological Aphorisms*, and therefore we say there will be some preceding differences, (perhaps verbal) which will begin to break forth at first clandestinely before those great deluges of affairs are transacted;

### *Astrological Judgments.*

acted; for we find, that upon the fifth day of *September* 1682 there will first be a Conjunction of *Mars* and *Jupiter* in 13 degree of *Leo*, and upon the 12. day of the same month in the aforesaid year there will be another Conjunction of (Tory) *Mars* with *Saturn* in the 17th degree of the same Sign; and again, in *December* following there happens a Conjunction of *Saturn* and *Jupiter* also, in or near 20. degrees thereof, and both swift in motion; then Matters, Treasons, Consultations, Treachery of Subjects against their Superiours, are Plotting, Contriving or Agitating some years before this Conjunction of *Saturn* and *Jupiter* is Celebrated.

Those pretending to Religion, or such as are famous for *Schisms*, *Heresies*, or of different Judgments from the profession of that Religion which is established by Authority, will for some years grumble and repine for restriction of their Consciences, (as they will term it) and the nearer unto the time of the Conjunction, the more Confederates they will have, and either near unto the time of the Conjunction it self, or a little after, we fear greater disturbance of those Nations, and the Princes they live under, disquieting their Governours, this for Conscience sake, as they pretend: But in some Nation breach of the Peoples Just Priviledges, Ancient Customs, and former enjoyed Rights will animate the generality to a strong and sturdy Rebellion, and countenance that Translation of Monarchy mentioned by *Trithemius*.

Certainly you Princes of *Italy*, as alio the *Roman Pontifex* or *Conclave* of *Cardinals* of the *Sea* of *Rome* will all of you find great & most grievous distempers in your Governments near the time limited, so will many People and Nations Subject to the Fiery Triplicity, and this evil will be more aggravated to those Kingdoms or Governments subject to the Signs *Taurus*, *Leo*, *Scorpio*, (that treacherous sign) and *Aquary*, (a most humane sign:) Those that desire to know the names of those Countries subject to the Signs mentioned, let them repair either to my *Christian Astrology*, or that excellent

### *Astrological Judgments.*

excellent piece of *Astrology* (viz. *Clavis Astrologia climata*) lately emitted into the world by that Industrious Artist Mr. Henry Coley.

Many believe the last Age of the world is at hand, We verily conjecture that a Troublesom and Vexatious time is approaching upon most Nations of *Europe*, wherein those pretending to Religion, whether *Papists* or *Protestants* will shew little mercy or compassion to those persons whose unhappines it will be to fall under their subjection, of which we might give presidents very ample.

The Conjunction of so many Planets in the Sign *Leo* in the year 1682, gives us very rational grounds to predict the appearance of another Comet, very strange Apparitions in the Air, or some prodigious Meteors either preceding that Conjunction, or subsequent in a short time after. And We also are fearful that some more than ordinary Fire or Fires may afflict or do considerable damage to many Cities of *Europe*; God keep this Judgment from the City of *London*, and bless her Inhabitants with much health and prosperity, and deliver her from another Plague or pestilential distemper in those years.

Of the Conjunctions of Saturn and Jupiter since the beginning of the world to this present Year 1677.

THE Ancients have taken the pains to give Us this Account, and have affirmed, that the first Conjunction of Saturn and Jupiter was Celebrated in the third year after the Flood in Sagittary, and that their several Conjunctions continued in the Fiery Triplicity out of Sagittary into Leo, then into Aries, then again into Sagittary, then into Leo, &c. But to gratifie the Industrious Sons of Art I shall present them with this following Table of the Years wherein the Conjunctions of those Planets happened in any of the Four Triplicities since the beginning of the World.

### *Astrological Judgments.*

We have the rather mentioned the entrance of the *Superiour Planets* into the several *Triplicities*, and their succession in every one, that those *Astrologers* who study the general Contingencies of Nations, Kingdoms, and of the world in general, might find (if they please to take the pains) the *Epoche* of them; and then considering seriously by History, what Kingdom, Monarchy, City, or Royal Family had its beginning then or near those times, we say they may by a serious scrutiny, and judicious consideration give a very probable Conjecture of the *Stability* or *Decay* thereof; but most *Astrologers* wanting such a Series of the Conjunctions, we thought it might not be amiss to insert them in this years *Anglicus*: We also intended to have mentioned the first beginning of many Families, and sundry Kingdoms, when, and what time, and under what Conjunctions they most flourished or most declined; but that may be (if God spare life) the work of another year; but as to the Judgment of these Conjunctions we refer them to our *Prophetical Merlin* printed at London 1644, which will give the studious *Artist* sufficient inspection into matters and things of this nature.

Let the Judicious remember, that all the Conjunctions of the two Superiours work more effectually when they concur with the *Eclipses* or *Mock-Stars* of that time, or any other prodigious *Meteor*; as also that their Conjunctions in the watry *Triplicity* wholly governed by *Mars* portend Wars, very Malignant Distempers, and Sicknes very Contagious, because of *Cancer* and *Scorpio*; as also great Cruelty used by the *Turks* or *Mahometans*, of that age against *Christians*.

Their *Conjunctions* in the fiery *Trigon* manifest great difference betwixt Christian Kings and Princes, and their Kingdoms and Monarchies much afflicted; of this *Triplicity* *Sol* and *Jupiter* are Lords or Chief Rulers.

Their *Conjunction* in the earthy *Triplicity* denotes great barrenness and scarcity, great mortality of four-footed

### *Astrological Judgments.*

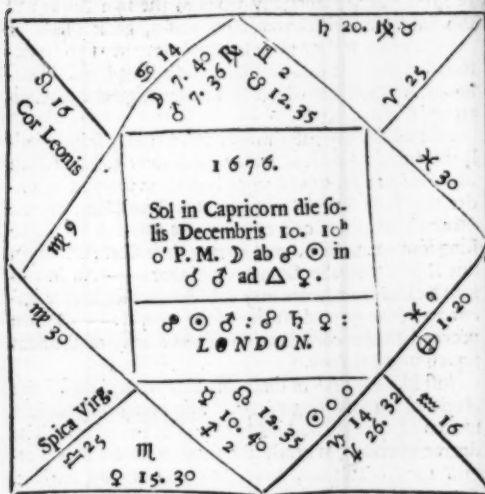

Beasts or Cattle, especially when in the sign *Taurus*; as also sudden and dangerous *Earthquakes*, great *Floods* or *Inundations*. If they meet in *Capricorn*, they signify destruction or great calamity unto those Kingdoms, Families or Principalities which had their Original Foundation under the watry *Triplicity*.

And when they pass through the *Airy Triplicity*, usually they portend destruction or much devastation of such *Monarchies* or *Principalities* as had their foundation under the *Fiery Trigon*; sometimes a Translation of one *Monarchy* or other, or a removal of a *Monarch* from one Kingdom to another, and during their Conjunctions in this *Triplicity* usually Comets do appear. — An Intelligent Reader from hence may collect many secrets for discovery of the general Affairs of the World: — But we proceed to the consideration of the *Scheme* of the Suns ingress into *Capricorn*.

Just like the present times, Signs *Bicorporeal* possess the *Angles* of the following *Figure*. Fair pretences generally spoken of, though nothing but fraud is intended. The degree ascending is nearly the same as at the *Vernal Ingress* 1676. The *Sun*, *Moon*, *Mars* and *Mercury*, angular, *Saturn* and *Venus* in cadent Houses applying to an *Opposition*. The General Affairs of many *Nations* are in a deplorable condition, the people much lamenting their impoverished Fortunes, their *Penury*, *Misery*, and late sustained *Afflictions* in this last *Summer*, some by leaving their Habitations, and forced to take their flight into other Parts far remote; others by damages received from the miserable necessitous *Souldiers*: these Calamities are only considerable as to *Foreign Nations*, in whose *Kingdoms* or *Countries* Armies of Men have either resided or passed through.

The Summer preceding hath been absolutely the most parching and dry of any hitherto remembered by the most ancient men living, especially in *Surrey*, and some adjacent Counties; very little, but rather great scarcity of

# Astrological Judgments.

water where no Rivers were near : Little or no Fruit  
and great scarcity of Hay, as also of Pease and Tares : such  
unmerciful heat appeared just as the Pease were blooming,  
that they produced nothing but straw, and that so parched  
with heat, as if it had been dried by fire : We fear  
the excess of drought in the Summer will be answered  
with as great an excess of waters this Winter ; (these  
things are but designed for punishments, &c.) Where-  
fore we conceive, and not without great reason, that the  
late Mock-star of the nature of Saturn and Mercury in Aries  
and Taurus did presignifie the destruction of great Cattle  
in Ireland, and some parts of England, and now is the  
forerunner of great devastation of Cattle generally in  
many

### *Astrological Judgments.*

many Counties of England for want of sufficient maintenance or fodder in this winter.

Although the winter Quarter is not convenient for military action, yet in regard the Moon and Mars are angular, and Mars moderately fortified, we may probably conjecture there will be many smart skirmishes as the season will permit, when least expected; but these rather by water than by land, as sea-fights, and of this kind there may be many, some whereof will be managed with great Gallantry and Courage—— Navigations (especially those towards the Baltique Sea) will be very dangerous and subject both to Piracy and surprize, or certain shipwracks——If we consider the great Ones of Nations, we find them much perplexed with unsettled and not well grounded Councils, great differences in the Judgments of the most wise Senators of Nations and Kingdoms; the Exchequers of Potentates empty, and no willingness in their Subjects to supply or recruit them: Venus (in that false and malicious fixed sign Scorpio) applies to an opposition of Saturn in the Ninth House, that part of Heaven signifies Religion and religious persons generally (according to the Opinion of all Astrologers) by which we may modestly fear that it prenotes not only the death of one or more consumptive Bishops or Cardinals, but also stumbling-blocks, and various delays or queries are produced to impede the Affairs of Princes by a dissatisfied People in point of Conscience.—

We deliver this generally to appear in all or most parts of Christendom this winter, or during the Consultations of December, January, February, and part of March. Men do dread a Consumption or lingering distemper in a person of great Quality, or in many grave Councillors, which may put the General Affairs of that Nation where this shall happen in much disorder, and the People in no small affright; and the more harm will succeed, if either that person expire, or those Councillors, who are intended by this Revolution—— Near this time many

### *Astrological Judgments.*

lavish Investives, and impertinent Queries possess the Vulgar both in Cities, Towns and Countries——And some of better quality are certainly tainted with the same foolery.

God in his great Mercy we hope will deliver His Majesty of *England* from such busie bodies in all His three Kingdoms, and grant him health and a long Reign——and then a figg for the Seditious——*Probitas generosa non patietur ei irrogare injuriam——sic est in satis——Post ubitum Deus avertat iram.*

The most material Diseases signified from this Ingress, subsequent in the three months following, are like to be distemper'd fancies, griping of the guts, palpitation of the heart, corrupt blood in the veins, the Scurvy, Sciatika, (which Diseases were very frequent in the year 1676.) Bruises by falling from high places, Melancholy, Winds, Cramps, Fluxes of rheums falling into the throat, and consequently sore throats, Quinsies, Kings Evil, and long lasting quartane Agues; (especially to those who inhabit near watry or foggy places,) many suffer by the *French Pox*, &c. violent burning Feavers, Surfeits occasioned by Drunkenness, Consumptions of the Lungs, and ulceration thereof. I proceed now to the consideration of the Vernal Figure, which according to the Rudolphine Tables appears as followeth.

In the Vernal Figure we find all the Planets (except *Mercury*) swift in motion, the two Superiours *Saturn* and *Jupiter* angular, and in fixed Signs, *Jupiter* applying to the Quadrant of *Saturn*; whose influence is put forward by his proximity to *Caput Meduse*, as also to the *Pleiades*. The Angles of the Figure are fixed; we could wish the stubborn differences of the present times were otherwise——*Mars* may very well be accounted the best fortified Planet in this Figure, as being Lord of the Sign Ascending, and in his Triplicity, and beholding the Ascendant by a perfect Trine Aspect. The Sign he is posited in is Tropical; by his Influence he stirs up Actions violent and unconstant,

# Astrological Judgments.

constant, promoting discontents and dislikes of Inferiours against their Superiours. *Mars* is now in Quartile Aspect to the *Moon*, who is posited in the Aequinoctial Sign *Libra*, and separated near one degree from his Quadrature; this portends some late or present fraction or discontent amongst the *Grandees of Nations* or Commonality, which may endure for a small time, but after a few dayes or weeks we hope may be composed by wise Counsel, for after some little time the *Moon* applys to a *Trine* of *Jupiter* who is posited in *Aquary* (a fixed humane Sign) near the Cusp of the fourth House, or North Angle.

Now considering the malicious Sign *Scorpio* Ascends (it being of all the whole *Zodiack* the most pernicious

### *Astrological Judgments.*

false and treacherous,) hence we may justly fear the great fraud, dissimulation and double dealing of most persons imployed for composure of present or future differences, whether they concern the general Affairs of Kingdoms and Nations, or the particular grievances of the Common People, &c.

We may well constitute *Saturn* and *Mars* Lords or Chief Rulers of the Vernal Quarter, in regard *Mars* is fortified as aforesaid, and *Saturn* is Angular: they are both accounted (from their evil influence) Infortunes and inimical to mankind—— *Mars* his position in the ninth House shews that the Industrious Merchant may have cause to fear shipwracks and Piracies. *Abscinduntur itinera, & erunt in itineribus latrones & prædones multi: & si signum nonæ fuerit aqueum* (as here in this Figure) *submergentur navigantes per mare: Viz.* If *Mars* be in the Ninth House and in a Watry Sign, there will not be much safety in long Voyages by reason of the many Corsairs, Pirates or Privateers, who will infest the Seas; thus *Haly*: but *Bonatus* is more copious, who saith, *Si fuerit Mars in revolutione anni, maxime in cancro, erit aperitio eorum que significaverit in partibus septentrionalibus; in cancro significat naufragia repente venientia, ex sorti & subito statu ventorum; & significat rixam, atque gravabuntur homines causâ redditus tributorum; & erunt febris, & alia ægitudines, & erunt dolores gutturis ac pectoris*—— *Albumasar* writes, *Erit annus periculosus; significat mortem quadrupedum, equorum magis, as he is occidental, curam atque sollicitudinem vulgi, seu rusticorum atque popularium circa propria negotia.* There may be much contained in these words, which being rendred into *English* run thus, *viz.* If *Mars* in the revolution of a year be in *Cancer*, therein especially he will manifest his influence in the Northern parts of the world, and those by sudden, strong, and unlooked for shipwracks, by reason of sudden gusts of wind: He threatens Wars, Differences, Contentions and Debates in the Western parts;

### *Astrological Judgments.*

parts; men shall be weary of those heavy burthens imposed upon them; there will be several Feavers and other distempers to afflict the bodies of Mankind; people will have great Infirmities in their throats and stomachs, &c. And *Albumasar* proceeds, and tells us it will be a dangerous year wherein a great dearth will be of four-footed *Beasts*, especially of *Horses*, and that the ordinary Man or Commonality of People will be carefull to preserve their proper Rights, Goods and Estates. This Judgment may really be expected to have its operation and effects in *Transmarine Parts*, where so vast numbers of Souldiers have had their Quarters this late *Winter*, and now or some months hence must be marching to other fresh Quarters or Habitations——We have no encouragement from hence to *Predict* the Wars beyond Seas are ended, but rather very like to continue longer, for in the year 1676, though many Persons, Souldiers, and eminent Commanders have lost their lives, yet Providence seems not to have decided the grand Controversie——One field-fight would turn the *Scales*, &c. which yet seem to hang in a manner equally ballanced; for if the Imperials have taken *Philipsburgh*, so also have the *French Forces* relieved *Maestricht* and raised that *Siege*: True it is, the most Christian King his Allie, the King of *Sweden*, hath been most passive in the last years Actions by his losses in *Pomerania*, yet to ballance these, the *Dutch* and *Spanish Fleets* suffered at *Messina*——

But we proceed: seeing the three Superiours are best dignified in the Figure of this present Ingress, we may with more confidence judge that the Actions either of *War* or *Treaties* will be managed with an high hand: sublime or stupendious Counsels, and long-lasting Consultations seem to consume much of this year; we fear to no great purpose, for the Planet *Mars* wholly inclines to War; true it is, *Venus* Aspects him with her benevolent *Trine*, but she is in a double bodied sign effeminate and subterranean——Those Princes who would  
willingly

### *Astrological Judgments.*

willingly embrace Peace, fear to offend their Allies lest thereby they might produce a War upon themselves and people from their former Friends—*Saturn* is Angular and fixed in that part of the Heavens (*viz.* the West Angle) which denotes Contentions, and he is there in Opposition to the Ascendant. *Bonatus* gives his Judgment of *Saturn* being in *Taurus*, thus, *viz.* *Significat impedimentum divitum & magnatum, & erit hoc in partibus meridianis* : He signifies great Impediments to those who are Rich, and have great Estates in the Southern parts of the world, which as matters now stand signifies the *West-Indies*, *Barbadoes*, *Jamaico*, and those Islands or Plantations, in which either the *French*, *Dutch*, *English*, or any other People have in the *Caribee Islands*. *Si Saturnus fuerit in Angulo & in Tauro, significat contentiones & bella, similiter mortem quadrupedum, & specialiter boum atq; vaccarum*—He farther signifies fixed Quarrels and Contentions, long lasting Wars or Miseries, and especially the death of Oxen and Cowes ; *Et maxime in terra deputata signo in quo ipse fuerit* ; chiefly in those Lands or Countries deputed to the sign he is in : these Countries which may be subject to his male Influence, are, *Polonia*, some parts of *Swetheland* (*viz.* the North part thereof,) many Countries subject to the *Muscovite*, some parts of *Ireland*, the Dukedom of *Lorrain*. He further saith, that his male position hath signification of Famine and Scarcity of such things as the earth produceth—*Et si fuerit in septima, & signo feminino, & ejus Dominus planeta femininus, significat malam voluntatem mulierum erga viros & earum inobedientiam*—Let *Guido Bonatus* English this, &c.

We could wish the Wars of *Europe* were determined, but such is the ambition and vain-glorious designs of *Grandees* we cannot expect any happy Conclusion : *Jupiter* in the Fourth House in a fixed sign applying to a *Quadrat* of *Saturn*—*Significat quod ibi erunt tristitia & diminutiones in illius anni fine, & significat voluntatem*

### *Astrological Judgments.*

*tatem & cogitationes regis in faciundo castra & loca defendendo si, in muniendo civitates & castra; incipiendo rixas privatim.* *Jupiter* as thus posited gives warning of the Peoples Wealth in the end of that year, and makes manifest, that the sole desire and intention of the King (of what Countrey he names not) is fixed wholly in building or framing strong Holds or Fortresses for his own Defence, *viz.* fortifying Cities and Castles, &c. acting his designs with great secrecie, very reserved in his intentions, alwayes or wholly intent upon mischief, and exciting Discord, Quarrels, Controversies, &c. but all this by under-hand and private contrivance—scarce mistrusted or suspected. This person (of so great Wisdom and Conduct) is represented by *Jupiter*, who either by himself, or advice of his great Council, or persons of much gravity and policy—if we may conjecture by the Sign *Jupiter* is in, represents the present Cham of Tartary, Emperour of *Muscovy*, or if this Politician lives nearer, then he or that Council may be intended to proceed from a Prince or person of Quality of *Valachia*, *Westphalia* in *Germany*, or in the West or Southwest of *Bavaria*.

We pray God no Rupture do happen concerning breach of Leagues, or Articles of former Friendship, whereby His Majesty of *Great Brittain*, or his Subjects might have just cause of complaint—Or that thereby a War might ensue either by Sea or Land—though some such thing may be feared, yet we hope in the mercy of God both for prevention and diversion of any such Calamity from the *English*.——

By what we have related, *viz.* the building of Forts, fortifying Towns and Castles, &c. we may conjecture that the present Wars of *Europe* are not to determine in the year 1677; for we find *Mars* Lord of the *Ascendant* of the year well dignified, and also the Angles fixed; to which may be added, the position of *Saturn* in the seventh House in opposition to the *Ascendant*, and the

### *Astrological Judgments.*

the House he is posited in having naturally the signification of Diffentions, Quarrelling, Debates, Wars and Blood-shed—Now to augment this signification, and aggravate the Judgment given, we find *Jupiter* near the Cusp of the fourth House, and hasting to a *Quadrante* of *Saturn*, who is invironed in his position with many violent fixed Stars of the nature of *Mars* and the *Moon*; these are arguments of Uproars, Tumults, Mutinies, Insurrections, and of such miserable events as are concomitant with, or presently after them——For according to *Origanus*, when *Mars* hath the sole Dominion of the Year at the Suns Ingress, he shall denote, *Inter homines bella movet*, he stirs up Wars, or excites men thereunto, *seditiones intestinas*, intestine seditions, *urbium excidia*, besieging and destruction of Towns and Cities, *tumultus populi*, the common people subject to, or suddenly raising tumults, *iras principum*, Princes apt to quarrel one with another very suddenly when least suspected, and thereby follows the death or slaughter of many of the Subjects——Many are like to perish by the sword——In the next place we will examine what manner of Diseases will most afflict the generality of People this present year 1677. *Viz.* As *Mars* is Lord of the East Angle, and governs the Sign *Scorpio*, it represents the secret parts of Man or Woman, and all infirmities incident to those parts, *viz.* Gravel, the Stone in the Bladder, Reins or Kidnies, all manner of Raptures whether Windy, Watry, or fleshy, *Fistula's*, the Hemorrhoids, vulgarly called the *Piles in ano* whether inward or outward, *Gonorrhoea*, *viz.* Running of the Reins, or Claps got by too much Venery with polluted Ladies, Priapisms, defects in the matrix of Women, abortions in bearing Children, or great weakness in those parts impeding sometimes Conception, and at other times occasioning miscarriage when conceived. As *Mars* is posited in *Cancer* he signifies most violent Feavers occasioned by Surfeits or too much drunkenness, or of great abundance of choler

### *Astrological Judgments.*

choler and phlegm lodging in the stomach, for naturally *Cancer* imports all Imperfections lodged in the breast or stomach, also weak Digestion, cold Stomachs, Phthicks, salt Phlegms, rotten Coughs, dropical Humours, Imposthumations in the stomach and those parts, &c. Cancers in Womens Breasts very difficultly cured either by internal or external applications——some we have known cut off, but (for the most part) the patient died; and we do well remember one Woman who had her breast cut off, and afterwards thought her self perfectly cured, or so well that she went to Church to return God thanks for her recovery, but she sickened the same day at night, and died within ten dayes after;——notwithstanding she had the best help could be had from the most (then) famous Chirurgeons of the City of London, &c. The *Moon* in *Libra* confirms our Judgment of the Diseases of the Year, and in effect signifies what we have already written.——

The present Wars beyond Seas have continued four years, we cannot give our self any hopes that they are yet like to determine, the Grand Work designed by all Configurations, Mock-stars, Eclipses, and especially from the Comet of the year 1572, being not at all accomplished.

True it is *Caput Mundi*, viz. the Pope of Rome died in the fourth year of the War——the conclusion of these Wars will fall with a terrible vengeance where least expected.——An Axe is laid to the Root of a very Great Oak, which not being very sharp is not yet arrived to the heart of it, time will compleat it——When the Body leans, the Branches (must needs) perish, and then, or not long after, the whole Body it self falls to the ground.

The Conjunctions of *Mars*, *Jupiter* and *Saturn* are approaching in *Leo*; the number *Eight* singly signifies much, 1678——more 1680——puts matters into Action. *Hic mundus septem etatibus rotatur in octavam: sunt septem spiritus Dei, quibus movetur spiritus noster, ut in Apocalypsi,* &c.

## Astrological Judgments.

*Ecce & omnium consummatio est perfectum, & renovatio in octava ut in harmonia, quia octava capit primam, & octava ad eternam requiem pertinet: Intelligentibus hæc scripta sunt.*

But seeing we find a small Eclipse of the Sun in Gemini this May 1677. we will a little descant upon its signification, and the rather, because Saturn, Venus, Mercury, the Sun and Moon, and *Cauda draconis* are all in that Sign, and by Position in the most significant Angle of the Figure, viz. the *Mediam Cæli*. It is delivered by some of the Ancients, *Parva Eclipsis parum significat*, but we fear that Aphorism will find contradiction by the Effects preceding and subsequent to its appearance, this ever observed—viz. *Licet Deus per intelligentias & cælos in hæc inferiora operatur, nonnunquam tamen his mediis, aut suspensio eorum ministerio immediate ex seipso illa facit, quæ opera tum miracula vocantur.* Although God by his Omnipotent Power doth operate by the intelligences and influence of the Heavens, yet sometimes he useth these as mediate Causes, or suspending their Ministry, does immediately perform those Actions by himself, and then those his Operations are called Miracles—all which will in conclusion of these now fatal *European Wars* be made manifest on a sudden when least expected by a miraculous change—and probably near the year or years by us limited.

*Mercury* is here sole Lord of the Eclipse in an airy Sign, and in his own House, nothing impeded either by Combustion, Retrogradation, or any male Aspect of the Infortunes, and very swift in motion—An Argument of profound Counsels on the Stage of the World, in most or all of the Courts of Kings, Princes and Potentates of *Europe* in general—God give an happy progress tending to the Peace and Unity of all Nations—*Sperandum*—It may be hoped for by many, but considering the several and manifold parties engaged in these unlucky differences; I say we have not confidence sufficient to believe

lieve any final determination.—And besides, the main work presignified by all the preceding Comets and Configurations have not had their intended Operation.

This Eclipse falls in the last Asterism of *Taurus*, which begins with the first degree of *Gemini*, and ends with the 26 degree thereof. Here are in this Asterism the *Hyades* and Stars in the horns of the Bull of the nature of *Mars*; there is also the *Buckler*, the foot and left shoulder of *Orion* of the nature of *Saturn*, *Jupiter*, *Mars* and *Mercury*, these usually prenote Thunder, Lightning, Fire. But the Sign being humane, and so many Planets in it of several influences may well presignifie violent threatening and thundering passions in mankind, whereby, and from whence may succeed pestilent diseases in Man, sturdy and furious wars carried on with great malice, spleen or anger, even to the destruction of many thousand persons.—Nor will the Consultations of *Grandees* be more moderate, nothing like to please the intemperate disposition of some in Authority but Fire and Sword for all that oppose their cholerick humours.—By such like humorous persons the Counsels of moderate *Grandees* are obstructed.—And in the end these tyrannical persons deservedly brought to condign punishment.—We the rather have adjudged so, because that poisonous perfidious Sign *Scorpio* is upon the Cusp of the fourth House, and *Tory Mars* the Ruler thereof is posited in the twelfth House hastening to an Opposition of *Jupiter*—viz. by secret Plots, contradicting wholesome advice for their own ends.

23. The swift and various motions of the Planets are to be considered, as also their slowness, because when they vary, the accidents of the Aspects do alter.

24. Saturn seldom applies to any Planet, by reason whereof he signifies great Princes and Monarchs.

25. A Partile Aspect comes to pass within the difference of three degrees; a Platick Aspect happens by a semidiameter of the Orbs of the Planets.

26. The vertue of a Pla. is in that house, whose beginning or cusp a planet precedes by no greater space than five degrees.

27. Understand the simple qualities of the planets, for from thence thou shalt know all their mixt significations.

28. Those Houses which behold not the Ascend<sup>r</sup> signify occult or obscure places, and these Houses are the 12<sup>th</sup> 8<sup>th</sup> and 6<sup>th</sup>.

29. The Application of Planets shews what is to Come, the Separation what is past.

JANUARIES *Observations.* 1677.

**T**He distressed Souldier in many Countries removes his late quarters, some by Land, others by water, in hope of better entertainment. An appearance of Grand Councils or Conventions of many learned persons in most or all the Kingdoms of *Europe*. At first all things or matters agitated seem fairly intended, or many are apt to believe so. Many Agents willing to condescend to immoderate Propositions, rather than to hazard their future Fortunes unto the doubtful success of another War: these seem to be *Deputies* from Inferiour *Princes*, wearied already with the former Calamities the late War hath produced——*Pamphlets* swell with News, one untruth after another, but in sundry parts of the World, mens fancies and idle wits are plotting mischief, or how to disturb the peace of that *City* or *Countrey* they live in, by suggesting fears into the minds of the People, pretending breach of this or that Custom or Priviledge; all this they augment in an high measure, undervaluing Authority, or the Government they live under—— We fear many Shipwracks near the Western and Eastern Coasts—— A worthy person seems preferred near this time. Scandalous *Pamphlets* appear, disgracing the Clergy of Nations—— A breach may be feared betwixt two Neighbour *Princes*—— Complaints are framing against an Eminent Council, &c.—

FEBRUARIES *Observations.* 1677.

THE various Configurations of the last month, may have their Effects in this, *Embassies*, *Embassadors* most concerned therein. The Superiour and Inferiour *Planets* are now direct in their motions—— The distempered Fancies of busie bodies seem to swell with great hopes of a successful deliverance—— *Parturimus montes.* Informations, Acculations and Petitions are framing against many Great Persons, not in one, but many Kingdoms of *Europe*—— *Cauda Draconis in decima, significat impedimentum Regum atque Nobilium, seu Magnatum, & diminutionem honoris eorum seu dignitatum:* The Dragons Tail in the tenth denotes many *Impediments* in the Affairs of *Princes*, *Nobles* and Great Men, with an undervaluing of that Honour which is due unto them; and a desire to cast many Officers from their Dignities or Places: Notwithstanding these Disturbances, preferment is confer'd upon a Sober deserving Person—— And News arrives from beyond Seas, as if Matters were like to proceed in good earnest—— However, this may prove a sad Month to some in *Europe*, if God divert not his Judgment, in impeding a memorable Accident wholly to happen herein.

MARCH's *Observations*. 1677.

THE Northern Kingdomes of EUROPE seem industrious in providing Shipping, and recruiting their Navies, for it is probable many Sea-fights may happen in this succeeding year—The *Corfaires* of *Tunis* and *Algier* very active as any People——New Leagues or Confederacies are framing beyond Seas, yet not much or any great appearance or reports of Wars : But the *Sun* no sooner enters *Aries* in this Month, than People generally begin to Conjecture of a War——God I hope will bless *England*, *Scotland* and *Ireland* with Peace and Safety——Many Addressees come from Forreign Parts——Great variance amongst the Grandees of Nations, one emulating another; persons differing in judgment concerning Religion, begin to be high, scandalizing their Superiours, and making Parties, but in the end, they procure their own harm and ruines——A rupture betwixt two Grandees of Europe is feared——*Iniquissima Pax Justissimo Bello anteferenda*——Great divisions in the *German* Councils, but very like to determine in Concord and Unity——

\* I hope now the Huffing Scorpionist is satisfied with those two smart Answers lately emitted into the world, to his Railing Vindication of the Sign Scorpio; written by two Learned and Ingenious Persons (who ever they were—) but me thinks he should not have forgotten those pretty Epithets he gives that Sign, viz. Malicious, Poisonous, Violent, Venemous, &c. Vide Collect. Genit. pag. 34. ult.

APRIL's Observations. 1677.

**I**ntelligence near these times arrives from the Western Parts of the World, as also from parts transmarine nearer unto England, we hope it is pleasing; and not long after *Missives* of high concernment to the Royal English Monarch, in whose Dominions of late have appeared small Divisions, in a fair way now of Reconcilement—— We begin to hope well of the Irish Affairs, the tranquillity and peace of that People and their concerns—— *Saturn* is hastening out of *Taurus*, we wish he do no harm in *Gemini*; *Jupiter* is posited in *Aquarius* and a fixed Sign—— *Significat augmentationem bonorum plurimum hominum, ex reliquiis mortuorum, & ex hereditatibus atque prediis, vel ex thesauris absconditis, vel inopinatis, & ex rebus antiquis, & auferentur maiores ab hominibus, & veniant res de quibus poterint latari, & auferentur ab eis rogationes male*: From hence we infer the death of many rich men, by whose death their Heirs will be advanced to large Inheritances, whereby they need not say, as formerly, *Our Father, &c.*—— There is also promised Acts of Grace for benefit of Princes Subjects, whereupon they will forbear grumbling or repining at their Superiours.—— Matters and Consultations seemingly in a fair way find a little obstruction from fiery spirits; but by prudent persons all differences are reconciled——

MAYS Observations. 1677.

**T**He *Messenians* of *Sicilia* now begin to be concerned, and also other adjacent parts——  
 All great Councils or Treaties at a stand, or very like to determine in vain——We do not find any probability of a firm Conclusion; we may fear, *Captivitates, injurias, malorum licentiam, & magni alicujus viri mortem*; many suffer by Imprisonments, others prosecuted injuriously; some take liberty to commit out-rages, and not long after succeeds the death of a great Man, either by a Consumption, or of Suffocation in his Throat——It's evident and apparent now, or near this Month, what all the *Monarchs* of *Europe* intend: The vulgar man male-contented, fearing new Tributes or Taxes will be imposed upon him. The *Polonians* somewhat divided, or slow in their Contributions for security of their *King*, or safety of their own Kingdom——Addresses are made to His Majesty of *Great Britain* from Foreign parts——Multiplicity of News arrives in *England*, God continue it——and still, now, and ever make the Nation thankful for the tranquillity we have enjoyed——  
 A small or inconsiderable Eclipse of the *Sun* is in this Month——*Denotat rixas, belli seminaria, egritudines & ex his mortes adolescentium maxime, religionis contemptum, insignes mutationes*——  
 Hence follow quarrelling, or debates like to be the seed-plots of a War, death of young men by Sicknes,——contempt of Religion,——Eminent Alterations——

## JUNES Observations. 1677.

**I**N the preceding *Eclipse* no less than *Five Planets* are in the Sign *Gemini*, the Ancient *Ascendant* of *LONDON*; the malevolent Planet *Saturn* newly entred into that Sign—— It's an airy Sign; it's the nature of *Saturn*, with poisonous judgments to infect the vulgar people, but *Venus* being with him intimates, the Prudence and Wisdom of her Magistrate in Chief, and his other Grand Officers will preserve her extravagant Commoners from active Insurrections, whereby either His Majesties City or the Nation might be prejudiced:— God preserve her Inhabitants from dangerous Fires in this and all *Months* to the end of the Chapter: *Mars* transits the Sign *Leo*, and is swift in motion, yet of late when in *Leo*, there have been either lesser or greater Fires, of which a rational account might be given—— Either *Death* or a long sickness seems to oppress an aged *Judge* or *Bishop*— but to his Place, Office or *Bishoprick* another younger person is suddenly advanced—— Probably warlike actions may begin near or in this Month, or surprise of a *Castle*, *Fort*, or *Strong Hold*, not without some bloodshed, for the Souldier seems marching from one place to another, Southward from the place of his late *Rendezvouz*, or place of abode—— or it may signifie the *Surrender* of a strong Hold by Composition—— or an *Attack* of a *Sea-town*, or surprise of Ships in an Harbour.

JULIES Observations. 1677.

SERIOUS Consultations agitated in *Holland, Scotland, Argiers, Tunis, Constantinople*, of which *Europe* will be very sensible in a few Months succeeding— We judge, *Prelia & effusiones sanguinis in partibus septentrionalibus; viz.* that some fights are near at hand in the Northern and North-east parts of *Europe*— The *Confederate Armies* beyond Seas seem to increase by many considerable additional Supplies— His Majesty of *France* powerfull both by Sea and Land, His Naval Forces greatly increased, and near this time large Supplies are transporting to the *Messenians*— Difficulty in the *Spanish Affairs* may continue for a while, either for want of a timely supply or negligence of her Officers— Perhaps the death of a Prime Officer may occasion that impediment we mention— There yet appears a great willingness in many *Princes* for Composure of the present Differences— Imperious persons contradict all such intentions— An Eminent *Churchman* beyond the Seas likely to be perferred to a *Cardinals Cap*— All Actions Warlike proceed with great vivacity, and it may be conjectured the cowardise of one *Governour* surrenders before any extremity or want might occasion it— Persons of *Princely Extraction, or descended of Noble Families*, surprised with Death on a sudden; and with them also Ladies of some Eminency.

# AUGUSTS Observations. 1677.

**T**His is like to be a Prodigious Month, for the variety of several transcendent Actions which may happen therein— The *Tartarians* menace *Poland* and its Confines with vast numbers of armed Men— The *Muscovite* and his Provinces dangerously oppressed and impoverished— Many Principalities in *Germany* suffer by one means or other. It may be doubted the Duke of *Bavaria* may receive prejudice in his Countrey— The *Hamburgers* also doubtful of being molested by a Neighbouring King or Prince— Many Principal Officers slain or desperately wounded in besieging an Eminent City or Town. A sudden Eruption of Souldiers into a Province when not suspected— *Inter Nobiles, Controversias, Cedes, infirmitates populatim grassantes, bella longo tempore duratura, & præter pestem lucuosam, multorum summorum virorum mortem ac inopinatum obitum, &c.* Pestsilent Feavers seem to have preceded in *July*, and yet in this Month to continue. An endeavour to imbroid *Italy* in War: The *Sec* of *Rome* doubtful of some impending Controversies, either in the *Conclave*, or with Neighbouring Princes— Armed Men, or Armies enter into some *Imperial Provinces*, but are quickly repulsed by a strong hand— and in these Rancounters it seems the *French* Forces may receive prejudice— God preserve *ENGLAND* and its *Metropolis* from all danger,—& nunc—& in sempiternum.

SEPTEMBERS *Observations.* 1677.

**I**N many Countries there appears more tranquillity than was by many expected, yet the Soldiers ramble, and it may be doubted the effects of some male preceding Configurations in *August* may have manifestation, or be brought to effects in this *September*, wherein the intemperate passions of men we much fear, may by *Pamphlets*, *Scandalous* and *Ignominious* and opprobrious attempts, provoke their *Superiours* and *Superiour Governours* to a condign punishment or chastisement of their malicious intentions, purposely managed to excite the People to Rebellion, Insurrections, Tumults, (*& quid non?*) The transit of *Saturn* in *Gemini* in a manner all this Month, and in the tenth and eleventh degree thereof gives an Eminent City caution to beware of *Fires*, and other disturbances near or in this Month; but we hope God of his great Mercy will protect it from such unwelcome Casualties—and bless her adventurous Merchants with plentiful and prosperous returns—Still those of different Judgments seem not fully satisfied—No great appearance of *Hurricane's*, or tempestuous Storms, whereby the Merchant might be dammaged in his *Trade*; yet as towards the beginning of the Month there should arrive comfortable Intelligence to the *English*, so also about the middle thereof News not so pleasing: perhaps it may be of some losses received by a People *England* hath a kindness for——

OCTOBERS Observations. 1677.

**T**Ory Mars is lately entred the watery and treacherous Sign *Scorpio*—— The Souldier uncapable of longer induring his sickly and moist Quarters, retires to more healthfull Quarters; however it may be doubted some attempts are intended, or stratagems practised for seizure (*per fas aut nefas*) of some Island or Sea-port: *Multitudo nubium, gravitas frigoris*; thick and condensed Clouds, or the season of the Year considered, the weather more cold—— *Multiplicabuntur latrocinia & abscissores viarum*—— Highwayes pestered with Thieves, the Seas with *Piratical Corsaires*—— Many Women suffer by *Abortion*, others by feminine distempers—— Pestilent Seditious Pamphlets printed and dispersed to the great scandal of that Authority gives the Authors Protection——but yet some pragmatick persons are called in question, &c. May all disturbers of *Englands* Peace be rewarded accordingly—— Malicious Scandals emitted purposely to affront or disgrace an Eminent *Judge* or Noble Person of this Nation—— The Courts of Justice may be sensible of great Extravagancies or Robberies committed in the Western Roads of *England*, some also Northward—— A middle aged person, either *Lawyer* or *Divine*, notwithstanding all opposition finds preferment—— The Northern Seas or Parts molested with storms, and unseasonable winds and weather.

· NOVEMBERS *Observations.* 1677.

THE *Spanish* Coasts very much infested with Pirates, many losses may be feared to happen, not only to His Subjects in those Parts, but also in his *Neatherland* Provinces, if not timely prevented : Many losses by shipwracks nearer home. The *Hungarian* Protestants, vulgarly stiled Rebels, many ways afflicted, or intended so to be, have great cause to fear a division or treachery in some of their Officers or Commanders, which may produce great misery and calamity unto them—Heavens direct the Lord Mayor of LONDON, and his Prudent Council ; and God preserve the City and Suburbs, both in the East and West parts, from all manner of harm, or any sudden Casualty——either from Impositions, Grievances, or different Judgments, *Amen.* The Courts of Justice sufficiently afflicted with various and difficult Concernments——God give the Reverend Judges the Wisdom of *Solomon* to determine those Controversies according to Justice——Authority, if not the Supreme of Nation or Nations much scandalized by Pragmatical Factious People in all or most Kingdoms and Principalities of *Europe*——Many Noble Persons end their dayes in or near this Month ; some with Age and Melancholy, others by lingring Consumptive Diseases.

## DECEMBERS *Observations.* 1677.

**I**N Parts beyond Seas, a most Worthy Officer at Arms finds preferment suitable to his former merits or deserts—— The Times begin to be more mild and calm: fiery spirits allayed, either by the Mercy of an Indulgent King, or by Advice of Moderate Divines—— We hope, notwithstanding some sudden Casualty, yet the Returns from *Spain* and *Portugal* prove successfull and advantageous—— Yet again smart Pamphlets fly abroad, but are soon suppressed—— We hope well from the *English* Plantations in *America*—— the juncture of Affairs in those places considered; and if the Sign *Libra* be justly distributed to *Jamaica*, it is hoped the Planters thrive therein—— All clouds of intemperancy seem to be taken off, and People generally inclined to obedience of their Superiours—— *Faxit Deus.*

God bless the KING of *ENGLAND*, His Nobility, and great Council of the *Senators* of this and all Dominions subject to the Monarchy of *Great Britain*——

*Obedience is better than Sacrifice*——

**G**eographical Cards designed and fitted to all our known *English* Games; faithfully representing the whole World; with the *Lat.* and *Long.* of all places: Whereby Geography may familiarly and easily be learnt by all sorts of people. Sold by *Henry Brome* at six pence per Pack.
